6 WAY ANTI-SURGE PROTECTION EXTENSION LEAD

Specification

Rated voltage	220–240V AC
Rated frequency.	50Hz
Fuse	13A
No. of sockets	6
Cable length	2m
Cable type	3 core

Symbols

Protection against electrical surges

Cable length

BS 1363 compliant

Important – Read before use:

This product is designed to protect sensitive electrical equipment, such as computers, from spikes or surges in the electricity supply. It is not sufficient to protect connected devices from lightning strikes as the magnitude of the surge will overload the device.

If the surge protection indication light is not illuminated, the product can no longer protect connected devices from electrical surges and should be replaced.

Max. load: 3,120W

WARNING! Do not use this product in wet conditions or wire it directly into the mains supply. Fully unravel the cable before use. This product is not rewirable.

WEEE (Waste Electrical & Electronic Equipment): **DO NOT** dispose of this product in with domestic waste; most local authorities provide appropriate recycling facilities.
