Product Name: Tungsten - Thoruim

1. Identification of the Substance/Preparation and the Company/Undertaking

### 1.1. Product identifier

Substance or preparation trade name: Tungsten-Thoruim

APPLICATIONS: For Stock No.15861 Thoristed Tungsten Electrodes, 2.4 x 150mm (Pack of 10)

98448 Thoriated Tungsten Electrodes, 1.6 x 150mm (Pack of 10)

1.2. Relevant identified uses of the substance or mixture and uses advised against

Identified uses Electrodes for Tungsten inert gas welding (TIG)

1.3. Details of the supplier of the safety data sheet

SUPPLIER: Draper Tools Ltd

Hursley Road Chandlers Ford Eastleigh Hampshire SO53 1YF

1.4. Emergency telephone number

Draper Helpline +44 (0) 2380 494344 Opening hours 8:30-17:00 Monday - Friday.

- 2: Hazards identification
  - 2.1. Classification of the substance or mixture

No Significant Hazard

2.2. Label elements

Signal words:

**Precautionary statements:** 

Date prepared: Nov, 2019 Issue:4 Page 1

### 2.3. Other hazards

PBT: This product is not identified as a PBT/vPvB substance

Thorium is a naturally occurring radioactive element, emitting primarily alpha radiation. Its decay products emit both alpha and gamma radiation. NCR exposure limit for natural thorium in air is 2 x 10 –12 micro curies per ml of air (9 micrograms per m3).

There are no recognized hazards associated directly with unused electrodes prior to grinding and welding. Packaged consumables may be heavy, and should be handled and stored with care. FOLLOW MANUAL HANDLING REGULATIONS.

Some very low levels of dust may be produced during handling. DO NOT BREATHE THE DUST. When preparing (grinding) and using these electrodes as part of the welding process additional potential hazards are likely:

GRINDING. Toxic dusts. ENSURE ADEQUATE DUST EXTRACTION, VENTILATION AND DUST DISPOSAL WELDING.

Electric shock from the welding equipment or electrode. This can be fatal. Hot metal spatter and heat, which can cause burns to the hand and body, and may cause fire if in contact with combustible materials. UV, IR and light radiation from the arc, which can produce 'arc eye' and possible eye damage to unprotected eyes. WEAR SUITABLE PROTECTIVE EQUIPMENT.

Fumes produced from the electrodes, material being welded and the arc radiation: Particulate fume

such as metal oxides from the electrodes, and complex metal oxides and silicates from the weld materials. Gaseous fume such as ozone and nitrogen oxides from the action of arc radiation on the atmosphere. SHORT TERM INHALATION OF THESE FUMES AND GASES MAY LEAD TO IRRITATION OF THE NOSE, THROAT AND EYES. LONG TERM OVEREXPOSURE OR INHALATION OF HIGH LEVELS OF FUMES MAY RESULT IN HARMFUL EFFECTS TO THE RESPIRATORY SYSTEM, CENTRAL NERVOUS SYSTEM AND LUNGS. LOCAL EXTRACTION AND /OR VENTILATION SHOULD BE USED TO ENSURE THAT ALL HAZARDOUS INGREDIENTS IN THE FUME ARE KEPT BELOW THEIR INDIVIDUAL OCCUPATIONAL EXPOSURE STANDARDS IN THE WELDER'S AND OTHER WORKERS' BREATHING ZONES.

NOTE: If welding is performed on plated or coated materials such as galvanized steel, excessive fume may be produced which contains additional hazardous components, and may result in metal fume fever and other health effects.

Composition/information on ingredients

Date prepared: Nov, 2019 Issue:4

### 3.1. Hazardous ingredients

Conc. CAS EINECS Reach Risk phrases

Tungsten 88-100% % 7440-33-7 231-143-9 01-2119488910-30-0003

Thoria 0 - 4% 1314-20-1 215-225-1 R45, 23, 24, 25, 33

## 4: First aid measures

## 4.1. Description of first aid measures

Skin contact: None

**Eye contact:** Rinse immediately with plenty of water for 15 minutes holding the eyelids open. Seek medical attention if irritation or symptoms persist. Contact lenses should be removed. Wash with water.

Ingestion: Rinse mouth and drink plenty of water.

Inhalation: Move the exposed person to fresh air. Seek medical attention if there are any adverse symptoms.

**4.2 Most important symptoms and effects, both acute and delayed Eye contact:** There may be irritation and redness.

Delayed / immediate effects: Immediate effects can be expected after short-term exposure

Inhalation: there may be long term adverse effects from inhalation of grinding dust

4.3. Indication of any immediate medical attention and special treatment needed

Immediate / special treatment: Eye bathing equipment should be available on the premises.

## 5: Fire-fighting measures

### 5.1. Extinguishing media

Water, A,B,C and Class D dry powder

5.2. Special hazards arising from the substance or mixture

Exposure hazards: In combustion produces Tungsten Trioxide WO<sub>3</sub> (CAS1314-35-8).

5.3. Advice for fire-fighters

Date prepared: Nov. 2019 Issue:4 Page 3

Advice for fire-fighters: Wear self-contained breathing apparatus. Wear protective clothing to prevent contact with skin and eyes

#### 6. Accidental release measures

Personal precautions

Ensure adequate ventilation of the working area...

safe.

Environmental precautions Do not allow product to enter drains. Prevent further spillage if

Clean up methods

Steps to be taken in case material is spilled or released, provide clean-up employees with respirators for dusty conditions (grinding dust). Dampen

down dust with water.

Absorb with inert, absorbent material. Sweep up. Transfer to

suitable, labelled containers for disposal. Clean spillage area

thoroughly with plenty of

soapy water.

#### 7. Handling and storage

Handling Avoid contact with eyes and skin. Ensure adequate ventilation of the working area. Adopt best Manual Handling considerations when handling, carrying and dispensing.

Storage When not in use, electrodes should be kept in a suitable store, the nature of which will depend upon the number of electrodes. For those holding up to a few hundreds of electrodes it may be most convenient to keep them in a metal cabinet or box since such a store would normally provide adequate shielding against external gamma radiation from bundles of electrodes. Those storing thousands of electrodes may find it more convenient to store them in a separate room. The shielding properties of the walls of the room will be more than adequate. Since the occupancy of a separate room should be very low, metal cabinets within the room would not be necessary. The number of electrodes in store should be kept to a minimum, taking account of expected usage and availability of further stock from manufacturers/suppliers.

#### 8. **Exposure Controls**

8.1 Exposure limits

Engineering measures

Hand protection Eye protection

Protective equipment

Reparatory protection

Ensure adequate ventilation of the working area.

Gloves or hand protection cream

safety spectacles

Wear protective clothing.

Particulate filtering mask (P2 type) recommended where dust or

aerosols are produced.

## 9. Physical and chemical properties

Appearance:

Physical form:

Solid.

Appearance:

Metallic grey rods.

Odour:

None.

## Important relevant safety parameters:

Value

Unit

Test method (67/548/EEC) Mel

Flame point

Chronic.

There is sufficient evidence to suggest Thorium directly causes cancer if inhaled or ingested.

## 12. Ecological information

Non hazardous in water

## 13 Disposal Considerations

General information national regulations.

Dispose of in compliance with all local and

Disposal methods

Contact a licensed waste disposal company. For disposal

within the EC, the appropriate code according to the European

Waste Catalogue (EWC)

should be used.

Disposal of packaging

Empty containers can be sent for disposal or recycling.

## 14. Transport information

Land (ADR)

UN 2909: radioactive substances, released package, products made of

natural thorium; class 7;

Sea (IMDG-Code)

UN 2909: radioactive substances, released package, products made of

natural thorium; class 7; EmS: F-I, S-S: pack up category A

Air (ICAO-TI/IATA-DGR)

UN 2909: radioactive substances, released package, products made of

natural thorium; class 7;

Further information The product is not classified as dangerous for carriage.

## 15. Regulatory information

## 16. Other Information

Risk phrases -

R45 May cause cancer

R23 Toxic by inhalation R24 Toxic in contact with skin

R25 Toxic if swallowed

R33 Danger of cumulative effects

Regulation (EC) No 1907/2006 of the European Parliament and of the Council, (REACH)
